

Restoring Operations

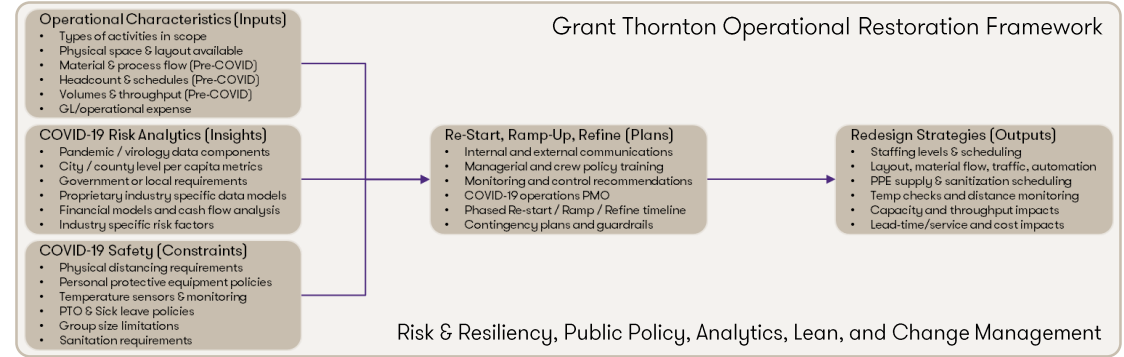

Where does this conversation fit?

We have robust Operational Transformation capabilities which can be brought to bear post-Close in deal cycles to drive enhanced value, but also during disruption events which require operational intervention or corrective response for future business resiliency.

Right now is the time to design adjustments to processes, layout, staffing levels, systems, controls, and ramp-up plans to ensure a successful restoration of physical operations.

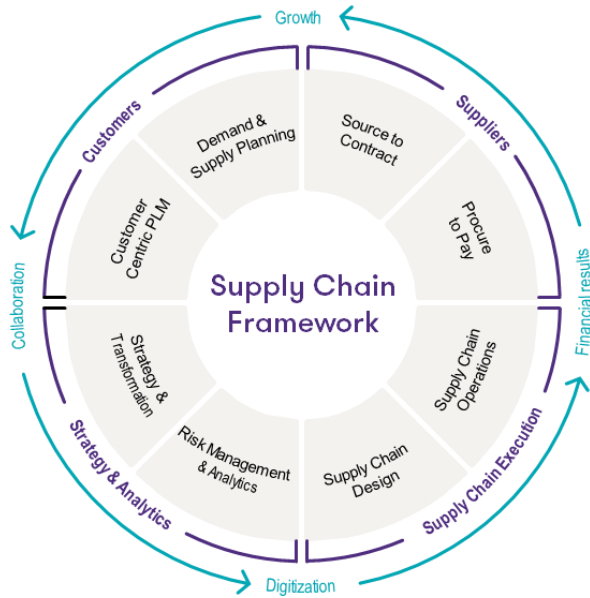

- Assess & Quantify**
 - Review pre-COVID operations and identify risk factors
 - Determine safety & applicable compliance requirements
 - Quantify impacts of reduced staffing, increased physical distancing, sanitization, etc on operational throughput, capacity, scheduling and costs
- Design & Plan**
 - Design risk mitigation and operational strategies
 - Re-design physical layout and material process flow using Industrial Engineering & Lean
 - Create phased re-start and ramp-up plan including controls and contingency plans along with local health officials
- Implement & Monitor**
 - Prepare documentation, messaging and comms for operational staff & mgmt.
 - Roll out phased restoration plan thru Agile-based sprints
 - Implement monitoring, controls & governance to ensure safety, COVID-19 policy compliance, and best business outcomes

Our Supply Chain Solutions

Our supply chain framework has eight core capabilities supported by over 30 unique supply chain solutions. We differentiate our engagement delivery model by tailoring the appropriate mix of our solutions for every client experience to achieve maximum value.

The Quantifiable Benefits of Our Supply Chain Solutions

We use supply chain transformation to generate cash flow for our clients, improve working capital efficiency, and reduce operating expenses. Our clients value our approach for injecting cash into the business without hurting customer experience.

5-20% cost reduction & margin expansion

1-2% revenue acceleration & growth

5-30% inventory reduction & improved ROIC

25-50% faster response to disruption
